SKILLS SUMMARY

- **Languages**: C, JAVA,Javascript,SQL,HTML
- **Frameworks**: Nextjs, Express, FastAPI,Tailwindcss , Boostrap,
- **Database** : PostgresSQL,MongoDB, MYSQL,Redis,Supbase,Firebase.
- **Tools& Platforms**: Git,Github,Jenkins,Docker, Kubernetes,Postman, Electron,Aws,Azure,Cloudflare,Wordpress.
- **Soft Skills**: Cross-Team Collaboration,Client Interaction,Technical communication.

WORK EXPERIENCE

FULL STACK DEVELOPER INTERN | OODSER **Jan 20- Apr 20 2025**

- Developed full-stack features across frontend , backend, and database layers, gained hands-on understanding of backend architecture,and received a ₹5,000 stipend for contributions.

FULL STACK DEVELOPER INTERN | MELANGE PUBLICATIONS | LINK **Jun 01- Jul 01 2025**

- Currently building a full-stack AI-powered web application using microservices, ,

TRU | Freelance **Dec 20- Current**

- Currently building a full-stack AI-powered web application using microservices,,message queues, caching architecture,and Docker–Kubernetes for scalable deployment.

LuxorHolidayHomeStays | Freelance | LINK **Jul 10- Aug 31 2025**

- Built and deployed a user-friendly villa booking website with custom domain setup, database-backed storage, payment integration, and integration,analytics and received a ₹30,000 prize amount for the project.

ICMBNT-2025,2026 | Conference Management Platform | LINK **Oct 20- Dec 20 2025**

- Developed the ICMNT conference website in 2025 and enhanced it in 2026 into a full conference management platform with end-to-,end features for event management, registrations, administration features,and received a ₹10,000 stipend.

PROJECTS

CloudShell Lab | LINK **Role:**Developer & Project Manager **Jan 10- Feb 25 2026**

- Built a cloud-native learning platform using custom Docker images and Kubernetes to automatically create temporary, browser-based cloud shells, providing users with on-demand, hands-on DevOps learning environments.

Focus-AI Productivity Tool | LINK **Role**:System Architect **Mar 20- Dec 31 2025**

- Built **FocusAI**, a productivity analytics desktop tool that tracks application and browser usage.The model. analyzes focus patterns, and delivers personalized data-driven productivity Score and reommedations

Complete CI- CD Pipeline(Full Stack) | LINK **Sep 5- Sep 20 2025**

- Built an end-to-end CI/CD pipeline for a full-stack application using Git, GitHub, GitLab, Jenkins, SonarQube , Docker, Kubernetes, and Argo CD, automating code quality analysis, build, test, containerization, and Continous deployment.

AWG Atmosheric Water generator | LINK **Role**:IOT Developer **Sep 25- Jan20 2025**

- Developed an IoT-based Atmospheric Water Generator (AWG) using a Peltier system,capable of producing 1– 2L/day with live sensor monitoring and predictive performance analytics.

CERTIFICATES

RHCSA (RedHat) | CERTIFICATE **July 2025**

- Gained hands-on expertise in Linux system administration, user management, networking,and shell operations.

GitHub Foundations(Github) | CERTIFICATE **Jan 2025**

best practices.

- Learned version control fundamentals, Git workflows, repositories, issues data basics, and collaboration best pratices.

Google Agent Course (Kaggle) | CERTIFICATE **Dec 2025**

- Developed a comprehensive understanding of the data life cycle and various stages involved in the data analysis.

PATENTS

AI-Powered Smart Parking System | **Patent No:** 202441093238 A **Filed:Nov 2024**

- AI-driven parking system using IoT sensors and OCR-based number plate recognition.

EDUCATION

KPR Institute of Engineering Technology Coimbatore, India
Bachelor of Computer Science and Engineering; CGPA: 8.3 **Sep 2023 - Jul 2027**
